

**Have you
saved a life
today?**

Donate to The Possibilities Fund and help save the life of someone battling Chronic Lymphatic Leukemia (CLL)

The drug Ibrutinib is a non-toxic treatment with costs in excess of \$10,000 per month. This is a lifesaving drug for people with CLL and the very best option out there today.

For a person on Medicare there is a \$500 to \$600 balance for the Ibrutinib treatment, each month. As time passes and the drug is FDA approved as a first line of defense, cost will go down. But, new and even better medications are on the way. Help to save and restore someone's life by donating to the Possibilities Fund. All donations go directly to help those who need Ibrutinib to stay alive pay, for the costly expense of this drug. Your donation matters and will be life changing for someone in your community.
